EXPERIENCE

Microsoft
Software Engineer – Azure BCDR (Business Continuity & Disaster Recovery)
Backend-focused engineer for Azure BCDR ensuring that customer workloads stay resilient & recoverable in the face of disruptions with cloud-native solutions that are scalable & operationally efficient.

Hyderabad, India
Aug 2024 - Present

- Designed and Implemented **Support for Direct Drive Disks** to enable **robust AKS backups and restores**.
- Ideated and built the **Modify Protection feature** and rolled out to add **flexibility for existing customers** to edit their protected workloads via portal, CLI and backend.
- Opened up Cross-region AKS backup & restore support to GA**, expanding Azure BCDR availability to **new customers and geographies**. and received internal recognition via the **Azure Core Culture Award**.
- Contributed & Upstream:** Actively contributing to **Velero OSS** and **Azure-specific integrations**; fixed Azure-specific bugs and closed async-workflow gaps downstream and **earned collaborator/triage status**.
- Improved Disk & AKS backup reliability and SLAs (target 99.99%)** through feature hardening and validation.
- Built resiliency & test coverage (BVTs, E2E chaos, and infra) to **detect regressions earlier** and validate complex restore scenarios.
- Cross-stack impact:** Provided end-to-end value across backend infra, frontend, CLI, K8s drivers, and Azure SDK integration to accelerate delivery and improve operability. Worked across layers to reduce customer friction and ship production-grade features.

Cloudera
SDE 2 – Compute Operations

Bengaluru, India
Dec 2023 - Aug 2024

- Architected and Delivered a **resource provisioning system** using **Ansible & Django**, streamlining allocation workflows and enforcing quota compliance across Kubernetes cluster with custom flavors. **Managed an org-wide** resilient app built on **Golang & ReactJS** platform for consistent cloud cleanup and cost analytics, delivering **\$5K/month savings**. Contributed to OSS projects such as **Apache Yunikorn**.

SDE 1 – Compute Operations

Aug 2022 - Dec 2023

- Built a full-stack **cloud cost optimization platform** across AWS and Azure, achieving **55% cost reduction in 3 months** and sustaining **30%** average savings (recognized with the **Cloudera Code Award**). Created migration workflows for **Rancher Kubernetes and Openshift clusters** and optimized Ansible-based deployment pipelines to improve provisioning efficiency.

SKILLS

Distributed Systems & Cloud Engineering | Systems Programming & Performance | RESTful APIs & Microservices | C#, Golang, Python, C/C++ | Kubernetes (Controllers, Operators, CSI) | Platform & Plugin Development | Containerization & Orchestration (Docker, Helm) | Infrastructure Automation & CI/CD | Observability & Tracing | Resiliency & Testing | Messaging & Storage Systems (Relational & NoSQL) | Security Management | Reliability Engineering | Applied AI Tooling

PROJECTS

Dear-Diary Mental Health Supervisor 📱

Dec 2020 – Mar 2021

Android app for mental health journaling with **CNN with Sentiment Analysis (NLTK)**; Rated **4.8/5** on Play Store.

HealthifyMe Medical Chatbot 📱

Sept 2021 – Oct 2021

AI-powered healthcare chatbot using **ML & Decision Trees** to assist with basic symptom analysis and guidance.

Virtual Input Controller 📱

Feb 2022 – Mar 2022

Gesture-based mouse and keyboard control system using **OpenCV** and hand-tracking modules for real-time input via webcam.

Portfolio Web App 📱

Mar 2023

Personal portfolio website showcasing projects and experience (ReactJS-based).

EDUCATION

B.Tech in Computer Science Engineering	Kalinga Institute Of Industrial Technology	2022	9.5 CGPA
Higher Secondary	FIITJEE Junior College	2018	94.1%
Secondary School	Little Angels School	2016	10 CGPA
